

# GO!NotifyLink End-of-Life Notice

Globo Mobile Technologies Inc. continually strives to provide robust and current solutions to our customers and consistently offers updated versions of our products. As new versions of *GO!NotifyLink* are released, previous versions are no longer sold and eventually, will not be supported.

Globo's policy for *GO!NotifyLink* products is to provide support for the current production version and one (1) previously released production version. In addition, periodic hotfix enhancements may be provided for the most recent release of the current production version. Products two (2) major release versions behind the current are considered to have reached their "end of life."

*GO!NotifyLink Enterprise Server 4.10.0* is the most current production version. Since this version is primarily a renaming of the NotifyLink product and does not contain functional updates, NotifyLink version 4.9.0 and versions 4.8.0, 4.8.1, and 4.8.2 will continue to be supported. Versions older than 4.8.0 have reached end-of-life status.

**With the release of *NotifyLink Enterprise Server 4.8***, support for the following NotifyLink product versions ended:

- NotifyLink Enterprise Server – version 4.6.x
- NotifyLink for BlackBerry – versions less than 4.7.x
- *NotifyLink for Palm OS* – All versions; Migrate to GO!NotifyLink's ActiveSync solution for Palm webOS devices or other supported device platforms
- *NotifyLink for Symbian S60, 3* – All versions; Migrate to GO!NotifyLink's ActiveSync solution for S60,3
- *NotifyLink for Windows Mobile* – All versions; Migrate to GO!NotifyLink's ActiveSync solution for Windows Mobile
